

# ProMinent® Packaged Plant

## Water and Waste Water Treatment Applications

ProMinent®

PAC system under assembly showing intermediate hopper, day hopper and transfer screw

ProMinent packaged plants are purpose designed and manufactured in Australia to meet the needs and flexibility of our clients. By combining the overseas and local knowledge to be found at ProMinent, we can offer the support and engineering input to meet your needs.

The eductor wetting system is used on powders like PAC and polyelectrolyte. The specially designed wetting chamber is more suitable for medium pressure discharges and feeds directly into our Spectra progressive cavity pump

Packages include:-

- 👉 pH correction and control;
  - Lime, caustic soda, soda ash etc,
- 👉 flocculant preparation and metering;
  - Alum, Polymer, Ferric Chloride etc,
- 👉 disinfectant metering, onsite preparation and control;
  - gaseous Chlorine, sodium hypochlorite, Ozone, UV, chlorine dioxide etc,

Incorporated into these plants are the ProMinent range of metering pumps or Spectra® helical rotor pumps for the more difficult metering duties such as Polymer and PAC. Spectra® pumps are also available for sludge and other sewage applications.
